

Download

1.- Install Docker desktop or engine in your laptop:

- See instructions in <https://www.docker.com>

2.- Install Git client.

- You can download from <https://git-scm.com/downloads>

3.- Download the docker image:

- `docker pull compss/compss-tutorial:patc2019`

This is a Linux container and we have tested on Linux and Mac , in case you have a Windows laptop, see how to run it in this web site:

- https://blogs.msdn.microsoft.com/premier_developer/2018/04/20/running-docker-windows-and-linux-containers-simultaneously/

4. For the Java hands-on, we also recommend you to install Eclipse IDE.

You can download from: <https://www.eclipse.org/downloads/>

In case you have issues with Docker. You can use the following alternative

1.- Install VirtualBox.

You can download from: <https://www.eclipse.org/downloads/>

2.- Download the COMPSs VM:

<http://compss.bsc.es/releases/vms/COMPSs-2.4-VM.ova>

3.- Import it in VirtualBox
